

NOTES

Use DB9 male connector for CAN

R3,R4,R5 pull-ups are optional to pull to 5v  
 They are only needed if BDM doesn't work well  
 If fitted BKPT,DSI & RESET should be open-drain  
 Otherwise BKPT,DSI & RESET should be push-pull

D1 (BDM TARGET POWER) probably not needed

Can use Microchip MCP2551 as direct  
 direct replacement for Philips PCA82C250
